STEP 1

Crabgrass Preventer

plus Lawn Food 20-0-4

When to Apply

For best results, apply during late February through Mid-April.

Ultimate 2 in 1 fertilizer. Prevents crabgrass, foxtail, goose grass and barnyard grass from existing in your lawn while giving your lawn nourishment to keep it lush and green.

DO NOT sow grass seed when using this product.

STEP 2

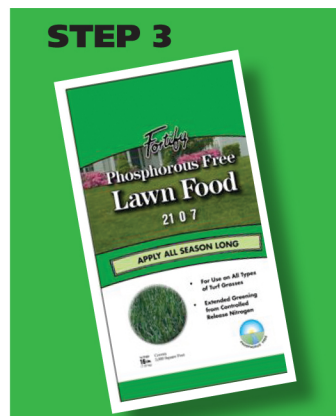

Weed Control

plus Lawn Food 22-0-3

When to Apply

Apply during April through June whenever weeds are present. Needs to have a dew on the lawn to stick to weeds with no rain for 24 hours.

Important Dual-purpose fertilizer. Kills broadleaf weeds including dandelions, clover, chickweed and more while providing nutrition to your lawn to thicken it up and fill in where weeds die.

STEP 3

Lawn Food

21-0-7

When to Apply

Apply in September through early October.

Great way to replenish your lawn and bring it back to life after a stressful summer.

STEP 4

Winterizer

18-0-12

When to Apply

Apply mid-October through November

Important in feeding the roots to thicken up your turf and make it thicker and greener in winter and in early spring.

Don't forget seed to fill in bare spots!
