- Do a weekly walkthrough of your yard/garden and check for invaders, both diseases and insects. If you discover a problem bring a sample in or take a picture and post it on our Facebook wall. We are here to help and we are sure we have a **Bonide** product that will work
- Along with checking for bugs check for weeds both in the yard and in the landscape
- Divide and reset irises, plant with **Bulb-tone**
- Plant canna and elephant ear. Both like lightweight well-draining soil so plant with mushroom compost and **Bio-tone Starter Plus**
- Trim the tops off peonies. Feed with **Flower-tone** and treat with **Bonide Rose Rx Systemic Drench**
- To increase tomato/pepper yield spray with a fruit/setting hormone
- Protect against end rot on tomatoes with combination of feeding with **Tomato-tone** and **Rot-stop Spray**
- Check for blight on vegetables and treat with **Copper Fungicide**
- Spray fruit trees with **Bonide Fruit Tree Guard**
- It may sound trivial, but HOW you water is extremely important. Have questions? Come ask us.

- To keep your annual flowers looking their best all season feed weekly with **Monty's Spray Sedge Ender** to kill nutgrass and crabgrass
- Spray your tomatoes with **Rot Stop** to add calcium and prevent blossom end rot, check tomatoes for early signs of blight spray accordingly
- Check cucumbers, melons, and squash for beetles. Beetles can be lethal to the plants so spray accordingly with **Captain Jack's Dead Bug Brew**
- Remember to feed roses monthly with **Rose-tone** to keep them performing their best, treat with **Rose Rx Systemic Drench**
- Start fall cole crops inside
- Use **Osmocote** in all your pots and planters to feed up to 6 months
- Put down **Weed Beater Complete** for pre & post emergent control of several types of weeds including crabgrass and nutgrass
- Protect your family with **Mosquito Beater** safe and easy to use
